

As we have been told all our lives TIME IS MONEY, so I am not going to take up too much of yours and try and save you some in the process. We have 3 simple questions...

- 1. Do you find value in delivering more loads in a day?
- 2. Do you value faster load and unload times out of your 3" pump design?
- 3. Do you value a reputation of quality, durability, and dependability by the most trusted pump company in the bulk liquid transport market?

If your answer is yes, let me introduce you to the 3632 High Flow 3" pump by Roper Pump Company. Roper's 3632 provides:

- Output flows 10 gallons per 100 RPM higher than the industry standard
 Roper 3622 3" design and similar competing pumps
- 18 GPM higher than the industry standard 3" Vane pump design coupled with a max speed of 900RPM

This beast of a pump can do it all, faster, with the same reliability you've come to expect from Roper Pump Company.

Know of a specific application you'd like to spec? Let us know! Between our friendly and knowledgable customer service team and our established network of channel partners, you'll be saving time and making more money in no time.
